

ASIM HUSAIN

 @asiimhusain  @asiimhusain studyboyasim01@gmail.com +91 7310647227 Noida, India

SUMMARY

AI/ML Engineer and Computer Science graduate specialized in AI ML DL. Fluent in Python, MLOps, SQL, backend development, and familiar with LLM, RAG and LangChain. Skilled in developing AI-driven systems and machine learning pipelines with a focus on performance, reliability, and real-world impact. Looking to join a team where I can turn ambitious AI ideas into products people actually use.

SKILLS

Languages & Backends:- Python, SQL, JavaScript, HTML5, CSS3, Bash, Flask/FastAPI, Databases(PostgreSQL, MongoDB), REST APIs

AI and ML:- MLOps, TensorFlow, Scikit-Learn, Data Analysis, RAG, LLM, VectorDB(ChromaDB), Gen AI

Tools & DevOps:- Azure, Docker, n8n, Copilot, CI/CD, Vercel, Git, Github, Jupyter Notebook

WORK EXPERIENCE

Machine Learning Intern

Aug 2025 - Jan 2026

Tech Weaves Lab, Noida, India

- Performed data collection, preprocessing, feature engineering, model training, evaluation, and fine-tuning for chatbots, disease prediction, NLP, and Computer Vision using CNNs and pre-trained models.
- Built a strong foundation in AI, Machine Learning, NLP, Computer Vision, and Agentic AI through structured training, developed Python GUI applications and worked with TensorFlow, Scikit-learn
- Worked on Generative AI and Deep Learning technologies including RAG, Transformers, GANs, and PyTorch to build intelligent AI systems and LLM-powered applications.

Data Analytics Internship

May 2025 – Jul 2025

Cetpa Infotech, Noida, India

- Automated data preprocessing, statistical analysis, and reporting workflows using Python, SQL, and Matplotlib, reducing manual effort by 40% and improving ML reporting efficiency.
- Analyzed 100k+ row datasets using Pandas & NumPy, applying feature engineering and visualization-based validation to improve reporting accuracy and reduce redundant data by 25%.
- Developed optimized SQL queries with joins and aggregations, performed CRUD operations, and created dashboards and visualizations to support model validation and data-driven decisions.

PROJECTS

RAG System [Code Repository](#) | [Live](#)

Python, FastAPI, Langchain, ChromaDB, SQLite, Docker, Azure, Jina AI, Claude, RAG

- Built a RAG system using FastAPI, LangChain, and ChromaDB. Optimized retrieval using Jina vector embeddings and a Multilingual Reranker. A concurrent session history database using SQLite in WAL mode. Containerized with Docker and deployed to Azure.

Multi-Disease Inference System [Code Repository](#) | [Live](#)

Python, Flask, Scikit-Learn, TensorFlow, PyTorch, PostgreSQL, Docker, Azure, NLP, SHAP

- Developed an AI-powered healthcare platform for disease prediction, X-ray screening, medical report analysis, and real-time assistance, leveraging ML models trained on 10K+ samples with 90+% accuracy and integrated analytics, monitoring, and automated reporting.

Virtual Interviewer [Code Repository](#) | [Live](#)

Python, Flask, REST APIs, OpenAI API, Web Speech API, PostgreSQL, Vercel, JavaScript, HTML/CSS.

- Built an AI-driven interview platform supporting 500+ concurrent users with real-time scoring, sentiment analysis, progress tracking, secure authentication, analytics dashboards, leaderboards, transcript exports, and admin management features.

EDUCATION

B.Tech CSE (AI ML DL Specialization) — GPA: 8.3/10

Teerthanker Mahaveer University, Moradabad

05/2026

ACHIEVEMENTS & CERTIFICATIONS

- Recognized as National Technology Day Winner (Software Category) at TMU for innovative project contribution
- AI/ML Engineering Certification (Coursera)
- GitHub Foundations Certification (Microsoft)
