

ASIM HUSAIN

 @asiimhusain  @asiimhusain studyboyasim01@gmail.com +91 7310647227 UP, India

SUMMARY

Undergraduate pursuing B.Tech in CSE (AI/ML/DL). Fluent in Python, Javascript, SQL (MySQL, PostgreSQL), backend development, and familiar with LLM, LangChain. Skilled in developing AI-driven systems and machine learning pipelines with a focus on performance, reliability, and real-world impact. Looking to join a team where I can turn ambitious AI ideas into products people actually use.

SKILLS

Languages:- Python, SQL, JavaScript, HTML5, CSS3, TailwindCSS

Backends:- Flask, Databases (MySQL, PostgreSQL, MongoDB), RESTful APIs

AI and ML:- Data Analysis, TensorFlow, Scikit-Learn, LangChain, ML Lifecycle, Prompting

Tools & DevOps:- Azure, Postman, Docker, Git, GitHub, n8n, Copilot, CI/CD(Gitlab, Actions), Render, Vercel

WORK EXPERIENCE

Machine Learning Intern

Aug 2025 - Jan 2026

Tech Weaves Lab, Sector 79, Noida, India

- Completed a 6-month hybrid internship with stipend starting Rs. 10,000/month + Rs. 1,150 monthly increment based on performance.
- Built strong foundation in AI, Machine Learning, NLP, CV and Agentic AI through structured training, while developing UI-based Python applications (calculator, games) and working extensively with TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, and Seaborn.
- Performed real-world data collection, preprocessing, and feature engineering for ML pipelines, also trained, evaluated, and fine-tuned models for chatbots, human and plant disease prediction, NLP tasks, and Computer Vision using CNNs and pre-trained models.
- Technologies: Python, AI/ML/DL, Git, GitHub, Docker, Kubernetes, Azure, Postman and API Integrations

Data Analytics Internship

May 2025 – Jul 2025

Cetpa Infotech, Noida, India

- Automated data preprocessing, statistical analysis, and reporting workflows using Python, SQL, and Matplotlib, reducing manual effort by approximately 40% and improving overall data pipeline efficiency for production ML reporting systems.
- Processed and analyzed 100k+ row structured datasets using Pandas & NumPy, implementing feature engineering pipelines and visualization-driven validation techniques that improved reporting accuracy and reduced redundant data by 25%.
- Designed optimized SQL queries with indexed joins and aggregation, also performed CRUD operations on databases, while generating analytical dashboards and data visualizations to support model validation and data-driven business decisions.
- Technologies: Python, SQL (MySQL, PostgreSQL), Jupyter Notebook, SQL Gate (IDE)

PROJECTS

Multi-Disease Inference System [Code Repository](#) | [Live](#)

- Built healthcare platform with disease prediction, X-ray screening using TensorFlow/Keras and PyTorch, and real-time chatbot.
- Trained Logistic Regression and Random Forest models on 10K+ samples achieving 95% accuracy with 5-fold cross-validation, SHAP-based explainability, hyperparameter tuning via GridSearchCV, and bias mitigation through structured error analysis.
- Architected REST APIs with PostgreSQL backend, optimized model inference under 800ms, and deployed via Docker on Azure.
- PDF reports generation using ReportLab with gauge visualizations, also built Flask-powered dashboard analytics, implemented latency health monitoring endpoints, and parsed medical reports using Python NLP pipelines.

Virtual Interviewer [Code Repository](#) | [Live](#)

- Built AI interview platform using Flask and PostgreSQL with real-time scoring, sentiment analysis, and progress tracking.
- Engineered timed interview workflows with session management, cached pools, and fallback handling for 500+ concurrent users.
- Developed analytics dashboard with Chart.js visualizations, leaderboard scoring, transcript downloads, and admin controls.
- Implemented secure authentication with bcrypt hashing, Flask-Mail SMTP OTP verification, Google/GitHub OAuth login, PostgreSQL-backed session management, and production-ready cloud deployment on Vercel.

EDUCATION

B.Tech CSE (AI ML DL Specialization) — GPA: 8.3/10

Teerthanker Mahaveer University, Moradabad

Expected 06/2026

ACHIEVEMENTS & CERTIFICATIONS

- Recognized as National Technology Day Winner (Software Category) at TMU for innovative project contribution
- Solved 350+ algorithmic problems on LeetCode, strengthening problem-solving skills in Python and C++
- AI/ML Engineering Certification (Coursera)
- GitHub Foundations Certification (Microsoft)
- SQL Basic Certification (HackerRank)
- Big Data Certification (NPTEL)
